

## Instructions for Submitting Samples:

**Customer Information** – Print your **name and address** in the space provided. **Check** the appropriate box as to how you wish to receive your results. Your results can be mailed through U.S. mail, emailed, or faxed. Note that receiving the results by email is the quickest form in which you will receive your results. Please fill in your email or fax number if this is how you would prefer to receive your results.

**Payment Information** – Enter your **account number** or the **amount** paid. The cost is **\$15.00 per sample** (subject to change) for Wisconsin residents.

Indicate the **method** of payment (cash, check, or credit card information) you are making. **Please make checks payable to: UW Soil Testing Lab.**

Your sample will be analyzed for pH, organic matter, available phosphorous (P) and available potassium (K). Based on the results of your test and what you told us you wish to grow in the sample area, we will tell you if you need to add nitrogen (N), phosphorous (P) or potassium (K) to achieve your goal of growing these plants. We will provide you with the pH of your soil and advise you on whether or not you should lime your soil. We will also provide you with the percent of organic matter which is currently in your soil.

Some common additional tests are as follows: lead, soluble salts, or physical analysis. Other tests include the secondary nutrients: calcium, magnesium, or sulfur or the micronutrients boron, manganese, and zinc.

Required Sample Size: 2 cups

**Sample Description** – **Name** your sample. In other words, describe your sample or the area in which the sample was taken so you are able to identify which sample corresponds to which results. (This is particularly important if several samples are submitted at the same time). Indicate the **county** in Wisconsin where the sample was taken from (this is important for us to provide recommendations). Choose the appropriate **Landscape Category** from the list which BEST describes the plants to be grown (for example, M4 for a mixed bed of annual and perennial flowers and shrubs). Only **one** landscape category per sample, please. We recommend that you provide us with different samples per landscape category.

**Topsoil Samples** – If sampling from a pile of topsoil, recommendations will be given assuming the entire area will be spread with at least 6 inches of new topsoil. If the entire top 6 inches will not be replaced and the new topsoil will be spread over the existing soil, take the sample after spreading.

**Submitting Samples** – Send your sample by U.S. mail, UPS, or other delivery system OR drop your sample off at one of the laboratories listed below. Please be sure to include this sheet.

**Soil & Plant Analysis Lab**  
8452 Mineral Point Road  
Verona WI 53593  
(608) 262-4364  
Hours: 7:45 to 4:30 Monday – Friday

**Soil & Forage Analysis Lab**  
2611 Yellowstone Drive  
Marshfield WI 54449  
(715) 387-2523, Ext 4  
Hours: 7:45 to 4:30 Monday – Friday

Results typically take two weeks from the time we receive your sample for you to receive your results, but this may vary depending on the time of year. If you do not receive your results after 2 or 3 weeks, please call. Thank you!
